MILESTONES NATIONAL REPORT 2024

EXECUTIVE SUMMARY

In 2019, the Milestones National Report introduced predictive probability values (PPVs) for specialties and subspecialties with sufficient data for analysis. PPVs estimate the likelihood that a resident or fellow who receives a particular Milestones rating on a subcompetency at a specific point in their educational program will fall below the recommended graduation target (Level 4) in the same subcompetency at the time of graduation.

PPVs also provide program directors and Clinical Competency Committee (CCC) members with a tool to identify residents and fellows who may be at risk of falling behind, using national data for each six-month block of the educational program. The Milestones are formative tools designed to support the professional development of residents and fellows. Therefore, PPV data can aid in decision-making for remediation or the development of individualized learning plans.

The PPVs are presented as matrices in a heat map format, ranging from yellow (lower risk) to red (higher risk) zones. When a resident or fellow is identified to be at an elevated risk of not reaching Level 4 for one or more subcompetencies by graduation, the next crucial step is to ask, "Why?" Program directors and CCC members are in the best position to understand the reasons for an individual's developmental trajectory and to collaborate with the resident or fellow to create an individualized learning plan.

The 2024 PPV report includes only Milestones 2.0 data. The number of available data points for each specialty/subspecialty will vary depending on the timing of that specialty's/subspecialty's implementation of Milestones 2.0. Specialties that have not utilized Milestones 2.0 for at least two years are excluded from the report.

MILESTONES NATIONAL REPORT 2024

TABLE OF CONTENTS

Background	5

MILESTONES NATIONAL REPORT 2024

BACKGROUND

The Milestones and PPVs are designed to help provide learners with formative feedback, thus better preparing physicians for an evolving health care system by assessing residents' and fellows' abilities and ensuring that their skills align with patients' needs in critical areas (Batalden et al. 2002; Ericsson 2007; Hodges 2010).

These tools support continuous monitoring and quality improvement in graduate medical education (GME), enabling individual programs to focus on specific competencies outlined by the Milestones and work toward improvements throughout the learners' journey to graduation. This ongoing effort ensures that graduates meet the expected standards of their specialty community and are equipped for independent practice.

This report focuses on programs with greater than 60 residents or fellows to ensure reliable estimation and to prevent inadvertently revealing individual performance evaluations. Additionally, specialties that have not used Milestones 2.0 for at least two years have been excluded from the report.

Development of Milestones 2.0

The development of individual Milestones was based on subcompetencies within each specialty/subspecialty (Sullivan et al. 2013). The creation of these detailed developmental markers of resident and fellow progression included members of the ACGME Review Committees, representatives from the American Board of Medical Specialties (ABMS) Member Boards, American Osteopathic Association (AOA) Certifying Boards, program directors of ACGME-accredited residency and fellowship programs, residents, fellows, representatives from specialty societies, and the public. The Milestones were written to cover the six Core Competencies and resulted in an average of 20-24 subcompetencies per specialty/subspecialty, with educational program periods ranging from single-year fellowships to residencies lasting seven years. Milestones 2.0 builds on a body of research and lessons learned to improve the quality and clarity of the Milestones. The subcompetencies for Systems-Based Practice (SBP), Practice-Based Learning and Improvement (PBLI), Professionalism (PROF), and Interpersonal and Communication Skills (ICS) in Milestones 2.0 sets are now shared across almost all specialties and subspecialties. This collaboration may enable designated institutional officials (DIOs) and program directors to share effective practices in assessment of these competencies and use of PPVs.

Intended Purpose of Milestones and PPVs

Tracking Milestones data for individual residents and fellows reflects the ACGME's commitment to professional self-regulation (Nasca et al. 2012; Nasca 2015; Institute of Medicine 2014) and its responsibility to meet public expectations for quality and safety. The PPVs use national data to create a valuable tool that residency and fellowship programs can use to support learner professional development.

The intended audience for this report includes program directors and CCC members, who support the professional development of learners throughout their residency and fellowship education. Residents and fellows may also use this report for their own professional development.

MILESTONES NATIONAL REPORT 2024

METHODS

Predictive Probability Values (PPV)

PPVs estimate the likelihood that a learner will fall below Level 4 (the recommended graduation target) in Milestone ratings at the time of graduation, based on national longitudinal Milestones data (Holmboe et al. 2020). In each table, PPVs are presented in columns corresponding to each six-month Milestone assessment period. For example, a value of 65.0 indicates a 65 percent probability that residents or fellows rated at a certain level or lower at that point in time will fall short of Level 4 at the time of graduation. These estimates are derived from longitudinal national Milestones ratings collected for learners graduating in June 2024. It is assumed that CCCs will assess current residents and fellows using similar rating practices as those applied in the previous year.

Table 1 provides guidance on how to use the PPVs.

Acknowledgments

The authors would like to thank the program directors who attended the feedback sessions at ACGME Annual Educational Conferences for their valuable insights. We also extend our thanks to the diverse stakeholder groups to whom these results have been presented. Additionally, we owe a great debt of gratitude to the staff members in the ACGME Department of Applications and Data Analysis.

For further inquiries or to engage with the ACGME Milestones team, refer to the contact information provided below.

MILESTONES NATIONAL REPORT 2024

KEY TO PPV TABLES

PPV tables provide the probability (expressed as a percentage) that a resident or fellow at or below a certain Milestones rating (Level) will fall below the recommended Level 4 at the time of graduation. In this report, PPVs are based on data from Milestones 2.0 assessments. For specialties/subspecialties in which a group of residents or fellows completed their entire educational program by June 2024, the PPVs were calculated using assessment data from their entire education and training period. For specialties in which the full educational program was not completed by June 2024, PPVs were calculated using only the assessments from the most recent two years of the program. An example of PPVs for a patient care subcompetency as of June 2024 is provided below.

Table 1: Example of PPV Reporting

The example is from Family Medicine, Patient Care (PC) Subcompetency 1

Subcompetency	Threshold	Yr1, Mid-Year	Yr1, Year-End	Yr2, Mid-Year	Yr2, Year-End	Yr3, Mid-Year
PC01 <i>Family Medicine</i>						
	≤ Lev 5.0					
	≤ Lev 4.5		19.1		19.4	
	≤ Lev 4.0		19.1	19.3	19.6	20.6
	≤ Lev 3.5	19.0	19.2	19.8	21.4	30.1
	≤ Lev 3.0	19.0	19.2	21.4	27.6	59.8
	≤ Lev 2.5	19.2	20.4	27.8	42.8	74.2
	≤ Lev 2.0	19.7	24.7	42.5	62.7	70.1
	≤ Lev 1.5	22.6	37.5	53.0	73.2	64.5
≤ Lev 1.0	30.6	48.3	39.1	43.1		

In this example, a family medicine resident receiving a rating of 2.0 or lower at the year-end PGY-2 Milestones review (dashed lines) has a **62.7** percent probability (based on national data) of not achieving Level 4 in Patient Care Subcompetency 1 by the end of the three-year residency.

PPVs are provided to help identify residents within a program who may be struggling to meet the recommended graduation targets for each subcompetency during each six-month block of the educational program. This information can then be used to support decisions regarding remediation or the development of individualized learning plans.
