Int.A.	<p><b>Definition of Graduate Medical Education</b></p> <p><i>Graduate medical education is the crucial step of professional development between medical school and autonomous clinical practice. It is in this vital phase of the continuum of medical education that residents learn to provide optimal patient care under the supervision of faculty members who not only instruct, but serve as role models of excellence, compassion, cultural sensitivity, professionalism, and scholarship.</i></p> <p><i>Graduate medical education transforms medical students into physician scholars who care for the patient, patient's family, and a diverse community; create and integrate new knowledge into practice; and educate future generations of physicians to serve the public. Practice patterns established during graduate medical education persist many years later.</i></p>	[None]	<p><b>Definition of Graduate Medical Education</b></p> <p><i>Graduate medical education is the crucial step of professional development between medical school and autonomous clinical practice. It is in this vital phase of the continuum of medical education that residents learn to provide optimal patient care under the supervision of faculty members who not only instruct, but serve as role models of excellence, compassion, cultural sensitivity, professionalism, and scholarship.</i></p> <p><i>Graduate medical education transforms medical students into physician scholars who care for the patient, patient's family, and a diverse community; create and integrate new knowledge into practice; and educate future generations of physicians to serve the public. Practice patterns established during graduate medical education persist many years later.</i></p>
Int.A. (Continued)	<p><i>Graduate medical education has as a core tenet the graded authority and responsibility for patient care. The care of patients is undertaken with appropriate faculty supervision and conditional independence, allowing residents to attain the knowledge, skills, attitudes, judgment, and empathy required for autonomous practice. Graduate medical education develops physicians who focus on excellence in delivery of safe, equitable, affordable, quality care; and the health of the populations they serve. Graduate medical education values the strength that a diverse group of physicians brings to medical care, and the importance of inclusive and psychologically safe learning environments.</i></p> <p><i>Graduate medical education occurs in clinical settings that establish the foundation for practice-based and lifelong learning. The professional development of the physician, begun in medical school, continues through faculty modeling of the effacement of self-interest in a humanistic environment that emphasizes joy in curiosity, problem-solving, academic rigor, and discovery. This transformation is often physically, emotionally, and intellectually demanding and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.</i></p>	[None] - (Continued)	<p><i>Graduate medical education has as a core tenet the graded authority and responsibility for patient care. Int.B.	<p><b>Definition of Specialty</b>                      Internists are specialists who care for adult patients through comprehensive, clinical problem solving. They integrate the history, physical examination, and all available data to deliver, direct, and coordinate care across varied clinical settings, both in person and remotely through telemedicine. Internists are diagnosticians who manage the care of patients who present with undifferentiated, complex illnesses, and comorbidities; promote health and health equity in communities; collaborate with colleagues; and lead, mentor, and serve multidisciplinary teams. Internists integrate care across organ systems and disease processes throughout the adult lifespan. They are expert communicators, creative and adaptable to the changing needs of patients and the health care environment. They advocate for their patients within the health care system to achieve the patient's and family's care goals. Internists embrace lifelong learning and the privilege and responsibility of educating patients, populations, and other health professionals. The discipline is characterized by a compassionate, cognitive, scholarly, relationship-oriented approach to comprehensive patient care.</p>	[None]	<p><b>Definition of Specialty</b>  <i>Internists are specialists who care for adult patients through comprehensive, clinical problem solving. Int.B. - (Continued)	<p>The successful, fulfilled internist maintains this core function and these core values. Internists find meaning and purpose in caring for individual patients with increased efficiency through well-functioning teams, and are equipped and trained to manage change effectively and lead those teams. They understand and manage the business of medicine to optimize cost-conscious care for their patients. They apply data management science to population and patient applications and help solve the clinical problems of their patients and their community. Internists communicate fluently and are able to educate and clearly explain complex data and concepts to all audiences, especially patients. They collaborate with patients to implement health care ethics in all aspects of their care. Internists display emotional intelligence in their relationships with colleagues, team members, and patients, maximizing both their own and their teams' well-being. They are dedicated professionals who have the knowledge, skills, and attitudes to effectively use all available resources, and bring intellectual curiosity and human warmth to their patients and community.</p>	[None] - (Continued)	<p><i>The successful, fulfilled internist maintains this core function and these core values.
